Product Description

201 304 316L 430 1.0mm thick half hard cold rolled stainless steel coil stainless steel strip coils

430 stainless steel

Type 430 Stainless Steel is perhaps the most popular non-hardenable ferritic stainless steel available. Type 430 is known for good corrosion, heat, oxidation resistance, and its decorative nature. It is important to note that when well polished or buffed its corrosion resistance increases. All welding must occur at higher temperatures, but it is easily machined, bent, and formed.
